Coperion Technology Update 2025

Who is this?

- 1 Change of Presence in S-Korea
- 2 Background of Establishing Coperion S-Korea
- 3 Timeline
- 4 Location
- 5 Role of Coperion S-Korea
- 6 Member of CSK and INFEED

Change of Presence in S-Korea

Large machine and plant business is covered by CSK and After Sales by INFEED

>> Coperion & Partner

- Active in South Korea since more than 30 years.
- Supporting the entire Coperion product portfolio / business areas e.g. Polyolefin, Compounding, Chemicals, Recycling, Battery, Food, etc.
- Present with CSK (located in Seoul) and our long-term partner Infeed (located in Suwon).
- Aftermarket business for all product groups is handled by Infeed.

>> Today

- We present and discuss all around the Polyolefin business
 - Extrusion (CES)
 - Material handling / PCS (MPS)
 - Additive & Feeding (EPO)

Background of establishing "CSK"

Coperion S-Korea (CSK) has been established to satisfy Customer voice / Market trend

Customer voice

- Prompt / Simple communication
 - Different Time Zone
 - Complex Communication Channel / Steps
- Developing a responsible local support
 - Site and office visits to share the status / ideas
 - Shortening the communication lead time
 - Avoiding the possibility of misunderstanding

Strategic necessity

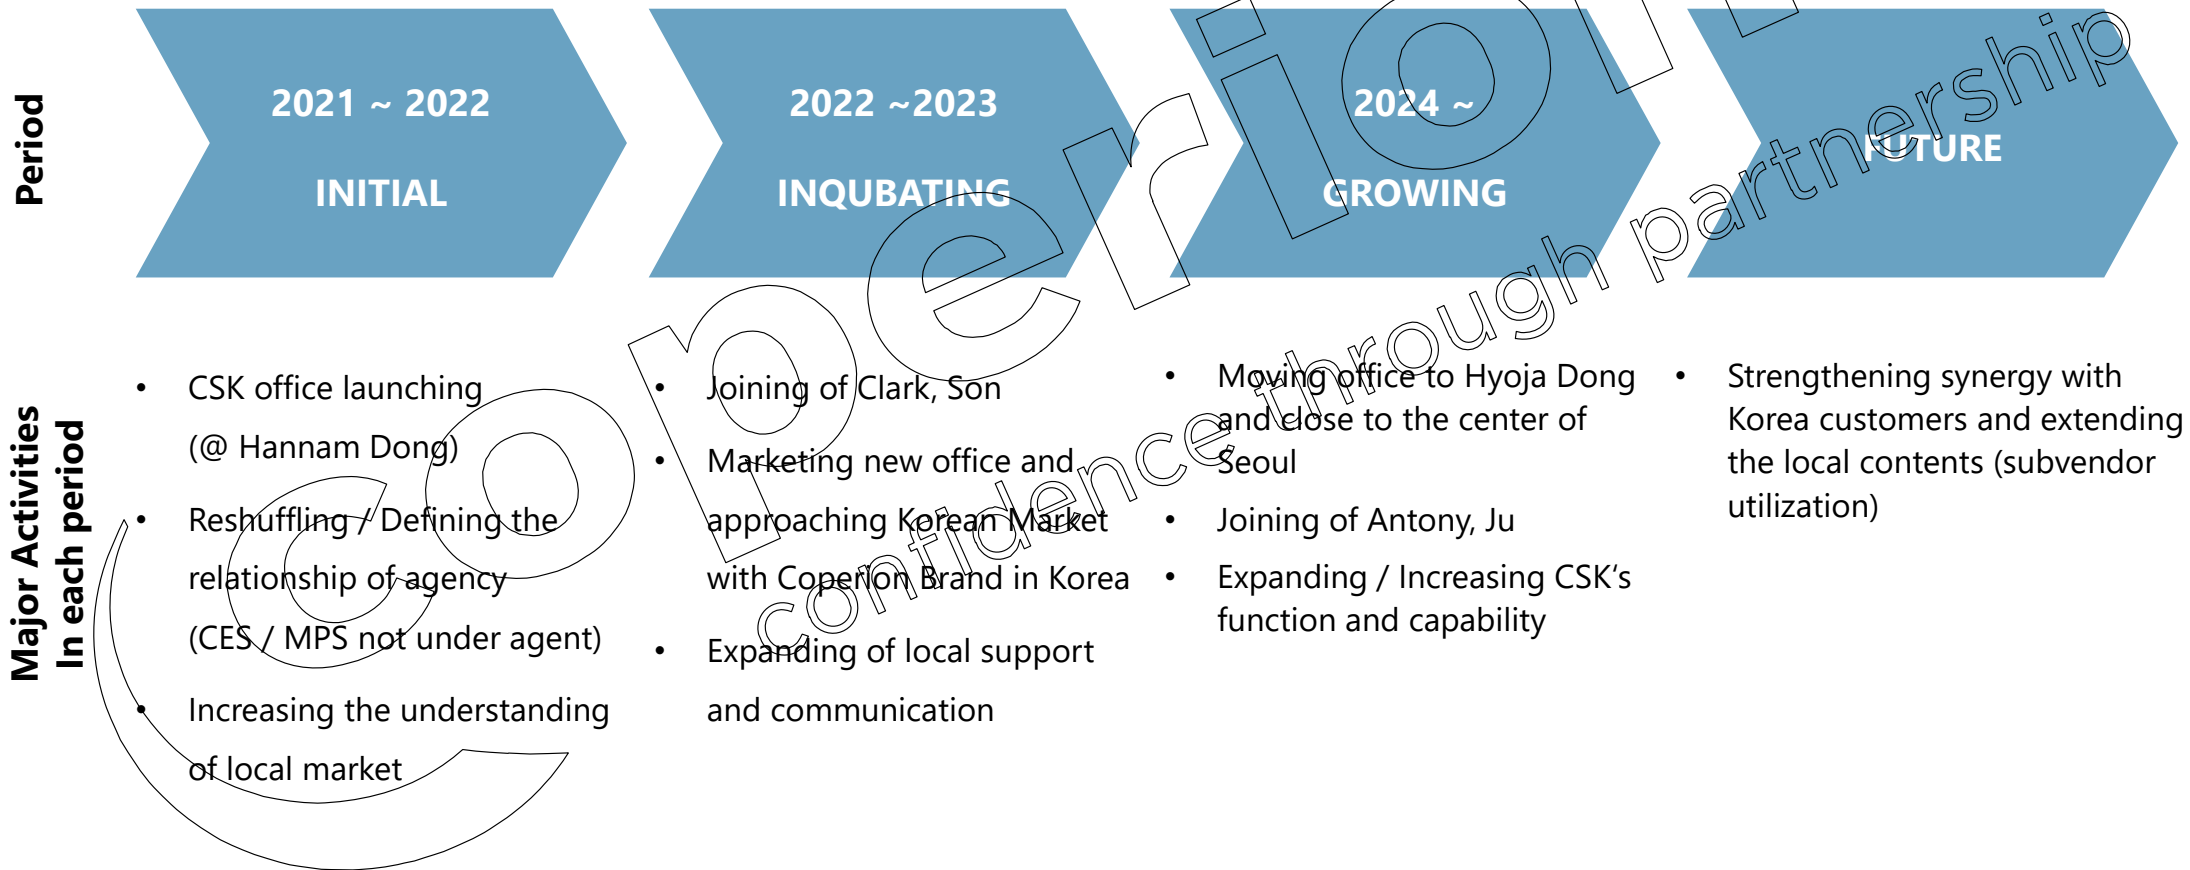

- Market Trend : Strategic important market of Korean Customers (EPC / Enduser) in global market
 - Extending the market from EPC to FEED / FS (feasibility study)
 - Increasing the competitiveness in the global market
- Our Initiatives
 - Better understanding the needs of Korean Customers
 - Expanding / Strengthening networking / Zippering
 - Strong introduction of Coperion Brand and Biz. area.

Establishment
of
